Note : 3) Based on the 9th revision of Korean Standard Industrial Classification

4) Average consumption propensity = (consumption expenditure / (income - non-consumption expenditure)) * 100

5) Engel's Coefficient = (food costs / consumption expenditure) * 100

6) M1 = cash currency (privately possessed money amount excluding commemoration money) + demand deposit and money market savings deposit account (including MMF of investment trust)

7) M2 = M1 + term deposit + installment savings and installment + market financial instruments + performance allotment products + bank debenture + others (however, excludes long-term financial instruments)

8) Lf = M2 + liquid product of 2+ years of savings-handling institute + securities finance deposit received, etc. + reserve fund for insurance contract of life insurance company.
